

組織図自動出力アプリの作成依頼

REQUEST TO CREATE AN ORGANIZATION CHART AUTOMATIC OUTPUT APPLICATION

Syslabo Corp.
株式会社シスラボ

<https://www.syslabo.com/>

BACKGROUND INTRODUCTION

SYSLABO Corp. is currently facing the following problems.

Once a year, an organizational change occurs, and a new organizational chart is handmade in Excel each time.

The "sys_users" master, which manages the list of employees, and the "cmn_department" master, which manages the organization information, should be always up-to-date. However, there is no application for maintenance and no history management.

If personnel changes occur during the period, the "sys_users" is corrected, and the organizational chart is manually revised accordingly.

There are 2 types of personnel: the one with multiple positions (concurrent duties) and the one with single position. The former concept is called "Kenmu (兼務)" in Japanese. The personnel in "Kenmu" status are indicated with symbol " (兼) " in our legacy organizational chart.

In addition, since "sys_users" has only one Department, it is not possible to manage the information of those who are also in charge.

Currently, the Excel that we make by hand is "組織図(Organization chart).xlsx".

REQUIREMENTS (1.&2.REQUIRED、3.&4.OPTION)

1. Please create and provide an application that automatically creates an organizational chart like the one created in "組織図 (Organization chart).xlsx".

The output format does not matter, but it should be printable (other than Excel is acceptable).

2. The applications that you create should be simple so that they can be maintained and modified by users other than the author.

If you need to build an application development environment, you must prepare and provide instructions for doing so.

3. We would like to have a simple function that allows us to maintain "sys_users" and "cmn_department", as we would like to manage the change history, if possible.
4. Since we would like to be able to manage the information of "concurrent duties" that we cannot currently manage, I would like you to design and propose a way to realize what kind of structure should be used to manage it (implementation is not required).

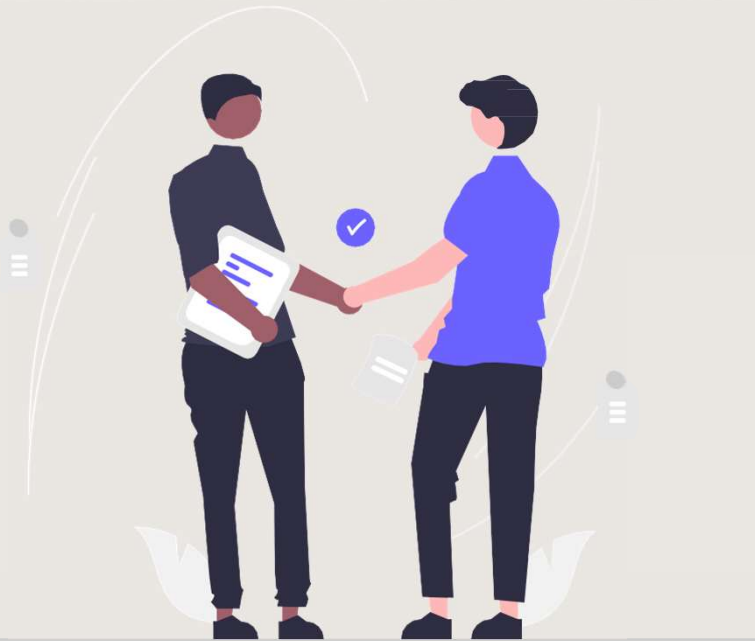

PRECAUTIONS (THINGS TO KEEP IN MIND)

- If you want to use a DBMS, please select one that can be used free of charge.
- When making modifications to "sys_users" or "cmn_department", please add items instead of modifying existing items as much as possible.
- If Japanese data interferes with development, there is no problem if the data is rewritten, but the output organization chart should use a character encoding that can handle Japanese, such as UTF-8.
- Please do not divert the files and data provided by SYSLABO for any purpose other than this project.

WE LOOK FORWARD TO YOUR PARTICIPATION

As the second stage of our recruitment process, we invite you to take on an application development assignment.

Based on the requirements provided, please develop an application and submit it together with a presentation video explaining your solution and development approach via email.

The submission deadline is **July 26 (SUN)**.

Following an evaluation period of approximately two weeks, all applicants will be notified of the results of their application. We look forward to receiving your submission.

If you have any questions or concerns, please do not hesitate to contact us.
